Magento Development

Magento Development

A Magento development based web application allow users to purchase desired products under multilevel categories. We developed a robust administration dashboard to manage all activities at the customer level. In the admin section, a user can manage the site as well as add, delete, activate, deactivate product and its image gallery with respective categories. Users can add their favorite products to the shopping cart and payments can be done online to purchase the product.

Objective

EUROPA's research with Anti-theft Engineering has a lot to offer. So they came to Sovereign, they needed a Magento website to increase the online presence of their business and also a selling platform. In the admin section, a user can manage the site as well as add, delete, activate, deactivate product and its image gallery with respective categories. We offer real-time management of your website along with the functional upgrades that are available at the professional desk of Magento. Users can add their favorite products to the shopping cart and payments can be done online to purchase the product. We analyze the back end metrics and tasks under the packaged deal for all our clients to make their website codes more precise.
