

iOS Application Development

iOS App Development

iOS App Development

Sovereign Software helps create appealing apps with our iOS Application Development. We are skilled in developing next-generation iOS applications to meet customer requirements. Irrespective to the project's complexity we use RAD method to deliver end-to-end software projects. Our app development services offer iBeacon Integration, NFC Integration, iOS App Porting which provides high-performance, feature-packed mobile experiences.

iOS Application Design

Our user experience design team has the best approach of developing a user engaging prototype, interfaces and user-oriented approach for your applications. Things like core graphics, touch handling, animations, and gestures at the top of

iOS Application Testing

Here at Sovereign we use automated as well as manual testing tools including XCTest, APPIUM, KIF, and Xcode testing framework to improve the performance of your application and debug all the possible issues

Swift

Swift is a versatile and powerful language for iOS, tvOS, watchOS, and macOS. Our iOS developers have deep experience delivering apps using Swift for iPhones, iPads, Apple Watch, and Apple TV

Objective C

Objective C was once the main programming language for iOS and has taken a back seat to Swift for newer iOS apps. Our development team is well-versed in both Objective C and Swift,

Xcode

Xcode is a development environment with tools that allow teams to develop software for Apple devices, from iPhones to the Apple TV. Supporting both Swift and Objective C.
